Python

PROFILE

I'm a Software Developer with expertise in JavaScript and Python.

I have a proven ability to deliver results in collaborative environments. I'm particularly experienced and interested in working with backend containerized microservices, such as Docker. I also possess strong problem-solving skills.

ATTACHMENT

Fullstack web developer, Vols Tech

Nairobi

Jun 2023 — Sep 2023

1. Developed and deployed a full-stack web application for stock analysis.
2. Implemented both front-end and back-end functionalities to create a comprehensive user interface and interactive features
3. Implemented cron jobs to automate daily updates of stock prices, enhancing the application's real-time data capabilities.
4. Configured and maintained an Instance server for hosting
